Chapter 1

OSLC-arch

OSLC is a collection of specifications for software integration. This module contains entities for **architecture management**.

Chapter 2

Module Documentation

2.1 Entities

2.1.0.1 ogit/OSLC-arch/Resource

A generic architecture resource. A resource of this type is likely to be a model or design artifact.

- id: <http://www.purl.org/ogit/OSLC-arch/Resource>
- valid-from: Thu Sep 22 00:00:00 UTC 2016
- creator: OGIT Importer
- scope: NTO
- parent: ogit/Node

2.1.0.2 ogit/OSLC-arch/LinkType

A locally managed resource that describes a link type predicate that might otherwise not be directly resolvable.

- id: <http://www.purl.org/ogit/OSLC-arch/LinkType>
- valid-from: Thu Sep 22 00:00:00 UTC 2016
- creator: OGIT Importer
- scope: NTO
- parent: ogit/Node
